Content or Graphics? An Empirical Analysis of Criteria for Award-Winning Websites

Rashmi Sinha, Marti Hearst & Melody Ivory
University of California, Berkeley

Maya Draisin
International Academy of Digital Arts and Sciences

For more information: <http://sims.berkeley.edu/~sinha/WebbyAwards>

Content or Graphics

Universal Access:
More People. More Situations.

Question: How can we identify characteristics of good websites on a large scale?

Question: How can we turn these characteristics into empirically validated guidelines?

Content or Graphics

Universal Access:
More People. More Situations.

- **Conduct Usability Studies:**
 - Hard to do on a large scale
- Find a corpus of websites already identified as good!

↓

Use the WebbyAwards database

Content or Graphics

Universal Access:

Talk Plan

- Details about WebbyAwards 2000
- Qualities of highly rated websites
- Relative importance of Content & Graphics
- Empirically validated design guidelines
- Future Plans: WebbyAwards 2001, user studies etc.

Content or Graphics

Universal Access:
More People. More Situations.

Criteria for submission to the WebbyAwards

- Anyone who has a current, live website
- Should be accessible to the general public
- Should be predominantly in English
- No limit to the number of entries that each person can make

Content or Graphics

3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

Site Category

- Sites must fit into at least one of 27 categories. For example:

• Arts	• Sports
• Activism	• Music
• Fashion	• News
• Health	• Personal Websites
• News	• Travel
• Radio	• Weird

Sites can be listed in multiple categories

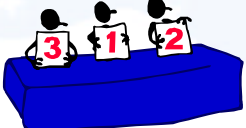

Content or Graphics

3rd Conference on Human Factors and the Web

THE Webby AWARDS Universal Access: More People. More Situations.

3 Stage Judging Process

- **Review Stage: From 3000 to 400 sites**
 - 3 judges rate each site on 6 criteria, and cast a vote if it will go to the next stage
- **Nominating Stage: From 400 to 135 sites**
 - 3 judges rate each site on 6 criteria, and cast a vote if it will go to the next stage

Content or Graphics 3rd Conference on Human Factors and the Web

THE Webby AWARDS Universal Access: More People. More Situations.

- **Final Stage: From 135 to 27 sites**
 - Judges casts vote for favorite site
- **People's Voice: 135 to 27 sites**
 - Anyone can vote for their favorite site among the ones in the final stage

Content or Graphics 3rd Conference on Human Factors and the Web

THE Webby AWARDS Universal Access: More People. More Situations.

Criteria for judging

- **6 criteria**
 - Overall Site Experience
 - **Five specific Criteria**
 - Content
 - Structure and Navigation
 - Visual Design
 - Interactivity
 - Functionality
- **Scale: 1-10 (highest)**

Content or Graphics 3rd Conference on Human Factors and the Web

THE Webby AWARDS Universal Access: More People. More Situations.

- **Content:** is the information provided on the site.

Good content is engaging, relevant, appropriate for the audience-you can tell it's been developed for the Web because it's clear and concise and it works in the medium ...

Content or Graphics 3rd Conference on Human Factors and the Web

THE Webby AWARDS Universal Access: More People. More Situations.

- **Structure & Navigation:** is the organization of information and navigation.

Sites with good structure and navigation are consistent and effective. They allow you to form a mental model of the information provided ...

Content or Graphics 3rd Conference on Human Factors and the Web

THE Webby AWARDS Universal Access: More People. More Situations.

- **Visual Design:** is the appearance of the site.

Good visual design is high quality, appropriate, and relevant for the audience and the message it is supporting ...

THE **Webby** AWARDS

Universal Access: More People. More Situations.

Webby Judges

- Internet professionals who work with and on the internet: new media journalists, editors, web developers, and other Internet professionals
- have clearly demonstrable familiarity with the category which they review

Content or Graphics

3rd Conference on Human Factors and the Web

THE **Webby** AWARDS

Universal Access: More People. More Situations.

Quick Review of Judging Process

- **Review Stage:** 3000 to 400 sites, each site judged by 3 judges
- **Nominating Stage:** 400 to 135 sites, each sites judged by 3 judges

Criteria for judging:

- Content
- Navigation
- Visual Design
- Functionality
- Interactivity
- Overall Experience

Content or Graphics

3rd Conference on Human Factors and the Web

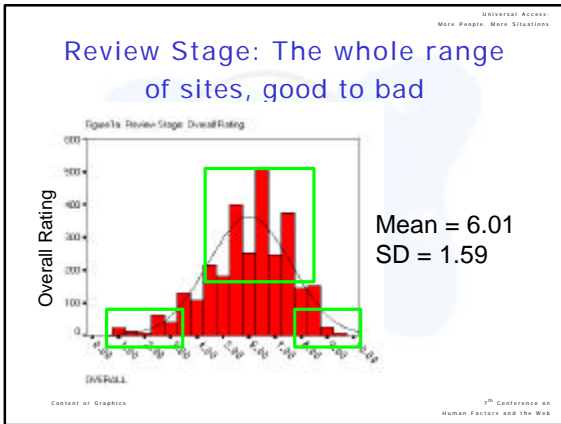

THE **Webby** AWARDS

Are we sampling from the whole range of websites (good to bad) in the Review Stage?

Content or Graphics

3rd Conference on Human Factors and the Web

Universal Access: More People. More Situations.

Can overall rating be predicted by specific criteria?
Statistical Technique: Regression analysis
Question: What % variance is explained by 5 criteria

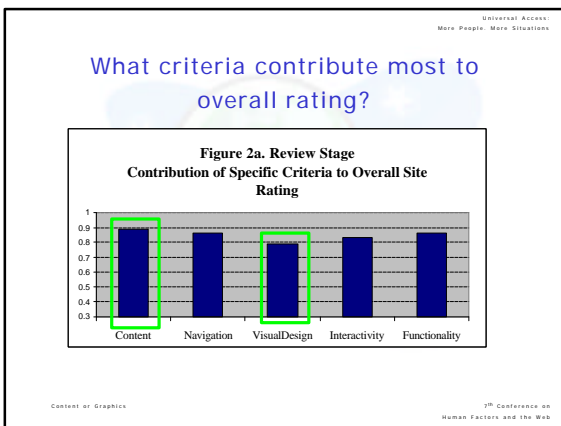

Percentage variance explained = 89%

Can votes be predicted by specific criteria?
Statistical Technique: Discriminant analysis
Question: Can we predict the votes from the 5 specific criteria?

Classification Accuracy for Sites = 91%

Content or Graphics

7th Conference on Human Factors and the Web

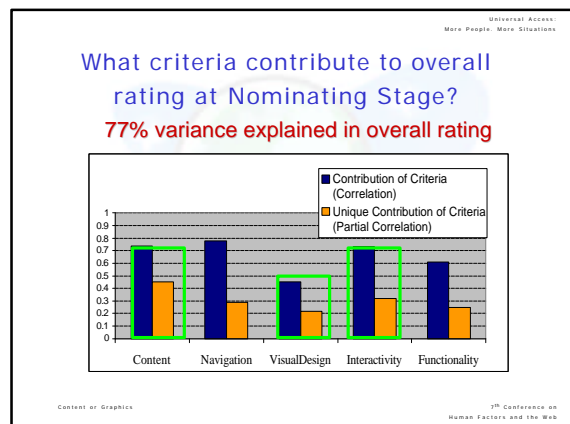

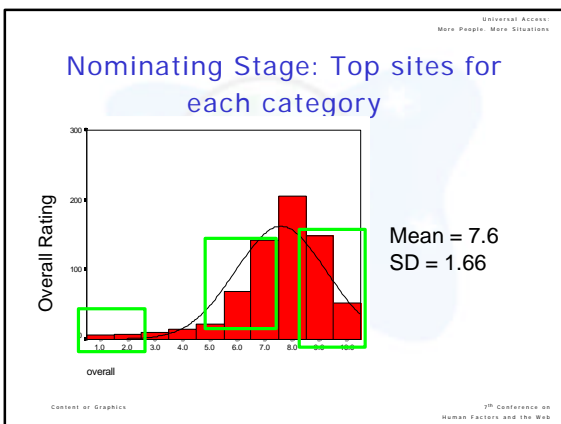

Universal Access: More People. More Situations.

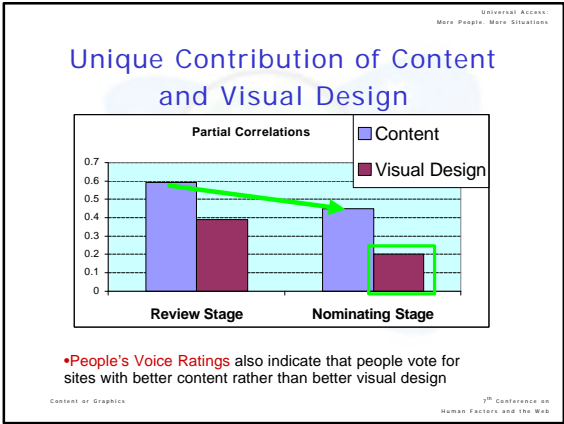

Nominating Stage Analysis

- 6 criteria
 - Content, Structure & Navigation, Visual Design, Functionality & Interactivity
 - Overall experience
- 400 sites
- 3 judges rated each site

Content or Graphics

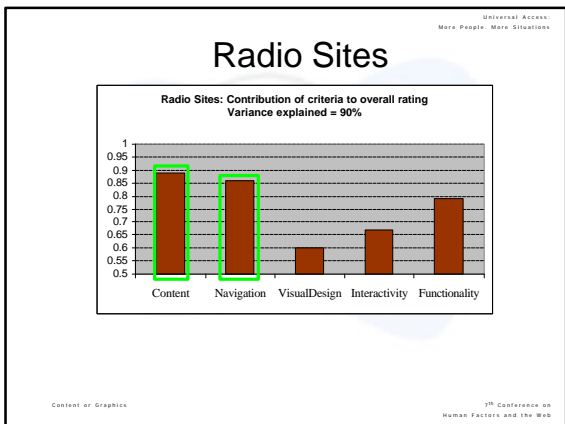

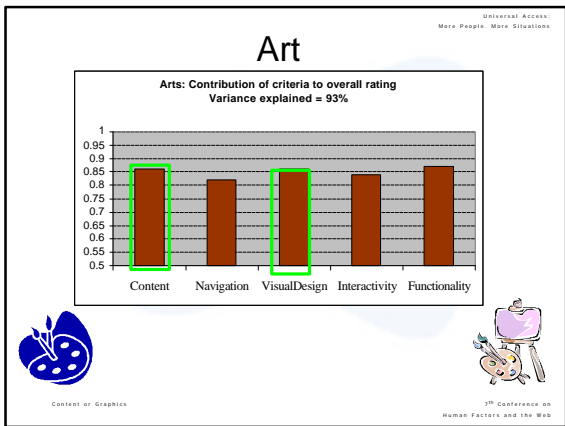

7th Conference on Human Factors and the Web

- Universal Access:
More People. More Situations.
- ## Summary of Findings
- The **specific ratings** do explain overall experience.
 - The best predictor of overall score is **content**.
 - The second best predictor is **interactivity**.
 - The worst predictor is **visual design**
- 3rd Conference on Human Factors and the Web

- Universal Access:
More People. More Situations.
- ## Are there differences between categories?
- Arts
 - Activism
 - Fashion
 - Health
 - News
 - Sports
 - Music
 - News
 - Personal Websites
 - Travel
- Focus on a few Categories
Art, Commerce & Radio
- 3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

Conclusions

- The importance of criteria varies by category.
- **Content** is by far the best predictor of overall site experience. **Interactivity** comes next.
- **Visual Design** does not have as much predictive power except in specific categories

Can we develop design guidelines by identifying characteristics of good web pages?

3rd Conference on
Human Factors and the Web

Universal Access:
More People. More Situations.

Study 2

- An empirical bottom-up approach to developing design guidelines
 - Challenge: How to go use Webby criteria to inform web page design?
 - Answer: **Identify quantitative measures that characterize pages**

3rd Conference on
Human Factors and the Web

Universal Access:
More People. More Situations.

Quantitative Measures

- **Page Composition**
 - words, links, images, ...
- **Page Formatting**
 - fonts, lists, colors, ...
- **Overall Characteristics**
 - information & layout quality

3rd Conference on
Human Factors and the Web

Universal Access:
More People. More Situations.

Quantitative page measures

- Word Count
- Body Text %
- Emphasized Body Text %
- Text Cluster Count
- Link Count
- Page Size
- Graphic %
- Color Count
- Font Count

3rd Conference on
Human Factors and the Web

Universal Access:

Quantitative Measures: Word Count

3rd Conference on
Human Factors and the Web

Universal Access:
More People. More Situations.

Study Design

Quantitative Page Metrics	Webby Ratings	Model Accuracy	
		Across Categories	Within Categories
•Word Count, Body Text %, Text Cluster Count, Link Count etc.	Highly Rated Sites Top 33%	67%	76%
	Low Rated Sites Bottom 33%	63%	83%

3rd Conference on
Human Factors and the Web

Universal Access:
More People. More Situations.

Classification Accuracy

- Comparing Top vs. bottom
- Accuracy higher for within categories

		N	Classification Accuracy	
			Top	Bottom
Within Categories	Overall	1286	67%	63%
	Community	305	83%	92%
	Education	368	76%	73%
	Finance	142	77%	93%
	Health	165	93%	87%
	Living	106	42%	76%
	Services	208	86%	75%
	Cat. Avg.		76%	83%

More People. More Situations.

What page metrics predict site quality

- All metrics played a role
 - However their role differed for various categories of pages (small, medium & large)
- Summary
 - Across all pages in the sample
 - Good pages had significantly smaller graphics percentage
 - Good pages had less emphasized body text
 - Good pages had more colors (on text)

Content of Graphics 3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

Role of Metrics for Medium Pages (230 words on average)

- Good medium pages
 - Emphasize less of the body text
 - Appear to organize text into clusters (e.g., lists and shaded table areas)
 - Use colors to distinguish headings from body text
- Suggests that these pages
 - Are easier to scan

Content of Graphics 3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

Low Rated Page

Content of Graphics 3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

High Rated Page

Content of Graphics 3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

Why does this approach work?

- Superficial page metrics reflect deeper aspects of information architecture, interactivity etc.

Content of Graphics 3rd Conference on Human Factors and the Web

Universal Access:
More People. More Situations.

Future work

- Do similar analysis for **Webby2001**
- **Add more metrics**
 - Aspects of info, navigation, and graphic design
- **Category-based profiles**
 - Use clustering to identify different kinds of good and poor sites
 - These can be used to suggest alternative designs
- Do **user studies** to verify guidelines

Content or Graphics 3rd Conference on
Human Factors and the Web

Universal Access:
More People. More Situations.

In Summary

- Developing an understanding of characteristics of good pages and also generating empirically validated design guidelines
- Laying the foundation for a new methodology
 - Empirical, bottom up
- Can predict if a page is good or not with some accuracy
